

## Vendor approval renewal from Saudi Aramco

Kaji Technology Corporation ("KAJI") has acquired vendor approval renewal from Saudi Arabian Oil Company ("Saudi Aramco") on the reciprocating compressor for plant and instrument air.

Approval renewal outline:

<b>VENDOR ID</b>	<b>10024457</b>
<b>PLANT ID</b>	<b>30007576</b>
<b>9COM</b>	<b>6000002246</b>
<b>DESCRIPTION</b>	<b>COMPRESSOR; RECIPROCATING TYPE, FOR PLANT &amp; INSTRUMENT AIR &amp; NITROGEN, LESS THAN 200 KW AND BELOW 50 BAR</b>

KAJI acquired the vendor approval from Saudi Aramco in 2015, which is valid until December of this year. And its renewal application was approved on May 19, 2020. The continuing strict quality control method to improve product quality is thought to have highly been evaluated. The next renewal of the vendor approval is scheduled in 2025.

At this renewal of the vendor approval, the applicable scope of compressors has been expanded to four categories including Nitrogen compressor, and originally approved plant and instrument air compressor. This will enable to expand KAJI's supply scope so that the opportunity of KAJI's order acquisition is expected to be increased.

Further to future business opportunities with Saudi Aramco, KAJI will endeavor to expand business on refinery and petrochemical plant construction projects in Middle East and other areas.
