

## **Delivery of six Reciprocating Compressors completed to S-OIL Corporation, Korea**

Kaji Technology Corporation ( "KAJI" ) has delivered four Hydrogen Gas Compressors and two Air Compressors, totaling six compressors to Korean major oil refining company, S-OIL Corporation (Plant location: Ulsan, Korea). The four Hydrogen Gas Compressors have been delivered through Mitsui Engineering & Shipbuilding Co., Ltd., which became the parent company of KAJI in March, 2017.

These compressors will be used at the Oil Refinery and Petrochemical Complex of S-OIL Corporation, whose expansion facilities are being constructed and targeted to start the commercial operation at the latter half of 2018. The complex will be one of the largest Korean oil-related facilities, consist of the new additional plants, i. e. Polypropylene (405,000ton/year) and Propylene Oxide (300,000ton/year), by using the residual oil as the raw material.

KAJI compressors have stably been operating for a long period in oil refinery and petrochemical plants of the world. Adoption of KAJI compressors by S-OIL Corporation has been achieved due to such high quality and reliability.

S-OIL Corporation is one of the affiliated companies of Saudi Aramco, whose vendor approval was acquired by KAJI in 2015. KAJI will aim to expand business with Saudi Aramco group, and other customers for worldwide refinery and petrochemical projects.
